Re: A-70881/DJB/MAK (Peak Parking)

NUMBER OF PAGES (including this transmittal sheet): 32

I have today emailed each of you electronic copies of the attached revised application and drawings. This FAX also includes a Declaration and an Assignment document that you should not yet date and sign and FAX back to me until the application is completely satisfactory to you.

Subject to further changes from you, we shall file the application this Wednesday, 3 October 2001 as a U.S. utility application and as a PCT application.

Per my earlier email messages of this date, I still have questions concerning:

- a) nomenclature as to unit 140: e.g., I use nomenclature V1, V2 ... V6 to designate two-way valves, not ports;
- b) as to whether present use of "pre-column" is all right;
- c) why the language at present page 10, lines 13-15 "Note that ... flow rate" should be deleted.

Please advise as soon as possible, electronically or via FAX, whichever is most convenient to you.

cc: David J. Brezner, Esq.
